
Financial Consulting and Investment Strategy Firm Celebrates Successful 2009, Eyes Even Stronger 2010

([PRNewsChannel](#)) / February 01, 2010 / Washington, D.C. / Instead of hoping to forget about the previous year and starting 2010 with a clean slate, Financial Investments, Inc. (FII) is looking to continue its momentum from a remarkable 2009, the [financial consulting](#) company announced today. The Washington, D.C. area investment firm is celebrating a decorated past year that saw recognition from *Inc.* magazine, the Virginia Chamber of Commerce, and Virginia Business Magazine.

Founded in 1997, FII is a registered investment management firm whose principal [alternative investment](#) programs consist of alternative investment products dealing with commodities, futures, equities, and equity indexes. The financial consulting company specializes in an alternative investment strategy that targets "Absolute Returns in an Uncommon Market." As many of their competitors struggled, FII continued to earn an excellent reputation among its institutional and high net worth clients.

"Our entities would not have had the year we had without the hard work and the dedication of our employees," says Kendall. "They're as passionate about delivering to our customers and clients the best in products and services. This has allowed us to deliver good returns for our clients, and has enabled us to grow as a specialized [Alternative Investment](#) firm."

One example of that remarkable growth is in the [investment management](#) company's wide client base. FII features more than 300 institutional and individual clients located in 42 states and 26 countries, which demonstrates FII's success as both a domestic financial consulting company and a trusted foreign investment firm.

In 2009, the [financial consulting](#) company had one product that generated a remarkable 39% return after fees, and a second product that produced a strong 29% return. For the month of January, each of their products were up 5.2% and 1.2% respectively. (Past performance is no indication of future results.) These results would be extraordinary in any economy, let alone one of the worst recessions of the last 75 years.

"When businesses across the country are laying people off, we're hiring additional people," says Kendall. "Basically, we're taking our success and reinvesting back into the company so as to further enhance our products and services so that we can make our relations with existing and future customers even better."

Risk Disclosure: There are substantial risks involved in trading options on futures and equities. The high degree of leverage that is often obtainable in options trading can work against you as well as for you. The volatile nature of the futures and high degree of leverage used in options may result in clients losing more than their original investment. Please consider carefully whether options are appropriate to your financial situation. Only risk capital should be used when trading options on futures and equities. Past results are not necessarily indicative or a guarantee of future results. Futures/options products are not suitable for all individuals.
